Professional Summary

Automation professional with 2 years and 8 months of experience in RPA development and process automation, with exposure to AI agents, LLM integration, prompt engineering, Document AI, and OCR. Experienced in building and maintaining Automation Anywhere A360 bots, developing Python automation components, integrating REST APIs, working with SQL, and supporting testing and production troubleshooting. Seeking to apply automation and emerging GenAI skills to intelligent automation and GenAI developer roles

Technical Skills

Programming & Scripting
Python, OOP, exception handling, file handling, data structures; basic JavaScript and PowerShell

Automation Anywhere 360
Developed and maintained RPA bots using Automation Anywhere A360 to automate business processes

SQL Database
Automation for tasks Data querying, validation, extraction, and database operations

Testing & Support
Unit testing, UAT, troubleshooting, RCA, and issue resolution

APIs & Data
REST APIs, JSON, SQL, database validation and operations

Prompt Engineering
Designing effective prompts for AI-assisted automation.

GenAI & Intelligent Automation
AI Agents (exposure), LLM integration (exposure), Prompt Engineering, Document AI, OCR

Documentation and analysis
Collaborate with Business Analysts and Solution Architects to understand automation requirements.

Professional Experience

Associate software engineer 03/2024 – 04/2026
Accenture Chennai

- Engineered and deployed 15+ Automation Anywhere bots integrated for document capture and data extraction, streamlining business processes and reducing task processing time by 80%.
- Performed root cause analysis for application and bot failures, using logs and SQL data to diagnose issues and support timely production resolution.
- Created test plans and validation scenarios; supported UAT and functional testing to improve deployment quality and reduce production defects.
- Contributed to AI-driven automation initiatives involving AI agents, LLM integration, prompt engineering, Document AI, and OCR (exposure).
- Automated web-based processes and application validation using Playwright, improving browser interaction and data extraction workflows.
- Developed Power Automate workflows using triggers, actions, conditions, and Microsoft 365 connectors to reduce repetitive manual work.

Associate analyst 08/2023 – 02/2024
Wipro, Chennai

- Developed and maintained automation bots using Automation AnywhereA360 to streamline repetitive business processes.
- Automated business workfl ows involving Excel, web applications, PDFdocuments, and email applications.
- Utilized Automation Anywhere Control Room to deploy, schedule, execute,and monitor bots.
- Provided production support by monitoring bot performance,troubleshooting failures, and implementing corrective actions

Education

Master of Computer Applications (MCA) 2021 – 2023
Kalasalingam academy of research and education
CGPA -6.7

Bachelors in Computer science (BSc,cs) 2018 – 2021
Pioneer Kumarswamy college
CGPA - 7.4
